Information within an EDI-message containing empties

The structure of an EDI-message containing empty packages differs slightly from an EDI-message containing filled packages. Only declarations regarding the part number and package material need to be adjusted.

It is mandatory to fill in the field „Customer article number" with the term QLEERGUT.

Field	Contents
Supplier article number	
Customer article number	QLEERGUT
Article weight in kg	
VAT rate	
Delivery quantity customer	0000000060,000
Quantity units customer	Piece
Delivery quantity supplier	0000000001,000
Quantity units supplier	—

Important: This applies only to return deliveries of empties.
Not applicable for deliveries including new load carriers.

Declaration of packages including the amount of returned empties.

The following fields must not be filled in case of returning empties: Filling capacity (per packaging item), package number and label identification.

Field	Contents
Supplier packaging number	44444446
Customer packaging number	2071
Filling capacity (per packaging item)	
Number of packaging items	0000000000004
Package number from	
Package number to	
Packaging dimension length	
Packaging dimension width	
Packaging dimension height	
Stacking factor	
Packaging ID	Returnable packaging
Label identification	
Ownership ID	Undefined

- In case you return empties only, it is mandatory to send an EDI-message as well.
- More information can be found in the EDI-manual https://supplier-portal.daimler.com/docs/DOC-1739 on chapter 4.
