

Quick guide

Search (I200):

Search for **already existing** arrival confirmations; Please note: In order to obtain a search result here, the arrival confirmation must have been generated in I201 beforehand. Various filters are available; a dedicated entry in the field "Supplier number" is mandatory.

New (I201):

Creation of new arrival confirmations; A dedicated entry of plant and plant part (if available) is necessary; It can be searched for a maximum period of three months; Please note for a period only one arrival confirmation can be created per supplier number; If all parameters are clear, this is the fastest way to create;

Search SNR per plant (I206):

Search of perimeters and subsequent creation possible; advantage compared to I200: Search can be carried out for longer than 3 months and without detailed knowledge of the plant part. However, these criteria must then be taken into account during creation;

Evaluation (D807):

Evaluation of already created consignment confirmations;
