#0030 Parcel deliveries – Special features of VDA 4913

Additional information for the CEP process

In general, the description VDA 4913 applies. The discrepancies for the CEP inbound deliveries (postal parcels) are described below. Please coordinate this number with the CEP service provider in advance and use "Let me Ship" to register.

Sentence type	Pos.	Place	Data item	Example/key for the entry
SA 712	05	17-30	Carrier	Name of the parcel service provider
SA 712	14	76-77	**Means of transport key**	**09**
SA 712	15	78-102	Means of transport number	Package number
SA 713	03	25-26	**Shipping**	**09**

Example view in IBL-DQM:

Carrier	SA712 Pos. 05	Parcel service
Means of transport code	SA712 Pos. 14	Parcel number
Means of transport number	SA712 Pos. 15	1267234687872

Mode of shipment	SA713 Pos. 06	Postal item

- The unloading point in the dial-up data and the let me Ship registration must match. How to ship the goods can be found in the https://supplier.mercedes-benz.com >> Cooperation >> Production and Logistics >> Worldwide Transport in the document *"Shipping Instructions for Parcel Shipments from Suppliers to MBAG_LetmeShip".*
- Creation of a dial-up goods consignment note (according to VDA 4912) is mandatory
- Labelling on the package:
  - Series material: KLT; CEP label; Dial-up consignment note
  - Non-series material : CEP label; Dial-up consignment note

- Detailed information can be found in the EDI Manual Chapter 4:
- EDI Manual | Mercedes-Benz Supplier Portal
- Important information about EDI, goods accompan... | Mercedes-Benz Supplier Portal
