

Data Verification of a VDA4921 Transport EDI

After a successful procedure test (see manual chapter 01. General + EDI connection) with the EDI hotline, every freight forwarder can transfer any amount of test data and check it independently. These tests can be carried out via Testplant 999.

EDI Manual: [EDI Manual | Mercedes-Benz Supplier Portal](#)

Data transfer to:

SSID: 00013000577MB000000OFTPV2

SFID: 00013000560MB050000

VFN: MB999WES

<input type="checkbox"/>	Status	Filter	Löschen	Daten- Empfangswerk	Waren- Empfangswerk
				999, Testwerk ▾	alle Werke ▾
<input type="checkbox"/>				999	999
<input type="checkbox"/>				999	999
<input type="checkbox"/>				999	999
<input type="checkbox"/>				999	999
<input type="checkbox"/>				999	999

The data is displayed in the IBL platform in the TM module in the function:

- Search transport data (T600)
- Data receiving plant: Select 999

Advantages:

- The errors are displayed as in real operation and can be corrected under Details in the T600 function
- Test can be repeated as often as desired
- The data is not forwarded to any subsequent system
- Incorrect data to the test factory will not be charged
- Error-free data can be subtracted via the export function

Attention:

- Please do not refer to real supplier data that is to be used for other transports

- Please always use Bordero numbers
- You can test and create labels as often as you like
