

What is causing a hierarchy error?

The function **D301 – Search consignment data** shows data referring to consignments where a VDA hierarchy error was detected.

When selecting the icon "VDA hierarchy error" all EDI consignments affected by this error will be shown.

> DQM > Consignments > Search consignment data (D301)

EDI 00274

EDICS number: 20220706081054x141pofp00001_00001_00002_p1

Transfer number: 00274 Data sender No.: 15498082A Data sender name: Johnson Electric

Status	Bordero Number	Consignment Number	Truck arrival Date	Truck arrival Time	EDI receipt date/time (MET) Date	EDI receipt date/time (MET) Time	Supplier Number	Transport partner Number
--------	----------------	--------------------	--------------------	--------------------	----------------------------------	----------------------------------	-----------------	--------------------------

Data for the EDI consignment 00274 can only be displayed in the original file (see icon top left), because the content has a hierarchy error and is not readable.

Error description: VDA Hierarchiefehler

Unlike with A-, B-, C-errors, the reason for structural errors cannot be determined exactly.

For these errors the original file has to be loaded and checked for errors using the download button.

The record types have to be in the following order:

with 715:

- 711
- 712
- 713
- 714
- 718 – if existing
- 715
- 719

with 715 and 716:

- 711
- 712
- 713
- 714
- 718 – if existing
- 716
- 715
- 719

- More information can be found in our EDI manual and in the VDA 4913 guideline
