Material label according to VDA 4902, version 4

VDA has developed a standard **material label**. This document is also recommended by **ODETTE**.

New techniques for goods receipt operations have made **barcodes** particularly important. Under the package system, the barcode is scanned. A comparison with the VDA 4913 EDI is run in the background. The quality of the barcode is crucial.

Special notes on usage

Type of attachment

For occupational safety reasons and also for ease of disposal of old labels, only use **plastic clips** or **spots of glue**.

Gluing over the entire surface is not permitted. This can make plastic containers unusable. In such cases, we have to pass the recycling, replacement and repacking costs on to the party causing the problem.

Attachment location, number of material labels

See table below.

Any other attachment locations must be agreed on in writing by the supplier and recipient.

Font size

The **unloading point** and **item number** must be shown in characters at least 10 mm high.

Load carrier type	Attachment location
Wire-mesh rack	Bottom right on broad side of base (1 standard label)
Sealed-wall container	Bottom right on broad side of base (1 standard label)
Insert rails-type load unit	Bottom right on broad side of base (1 standard label)
Load unit with VDA small load carriers	<ul style="list-style-type: none"> a) Bottom right on broad side of base (1 standard label) b) End face (narrow side) in the document pouches/label holders provided on each small load carriers (1 small label)

Layout specimen for standard label

(1) Warenempfänger Sindelfingen		(2) Abladestelle 659Z	
(3) Lieferschein-Nr. (N) 78923164 		(4) Lieferantenanschrift (Kurzname, Werk, PLZ, Ort) Testlieferant 4444444	
		(5) Gewicht netto	(6) Gewicht brutto
		(7) Anzahl Packstücke 1	
(8) Sach-Nr. Kunde(P) A1111111111 			
(9) Füllmenge (Q) 0 		(10) Bezeichnung Lieferung, Leistung	
		(11.2) Packmittelnummer Kunde 5003 (11.4) UNGD-Nr.	
(12) Lieferanten-Nr. (V) 44444446 		(13) Datum D140124	(14) Änderungsstand Konstruktion
(15) Packstücknummer (S, M, G) 		(16) Chargen-Nr. (H) 	

Sample is not to scale.
