1 Research Freight Billing (Function T810)

In the **Research Freight Billing (T810)**, freight carriers can display the freight data for the billing for the Bordero numbers and use this to create or clear the freight statement. Furthermore, the function can support communication with the auditors.

- Here you have to specify the **time period** to which the search should relate. The **date** is entered in numerical form **dd.mm.yy** or selected via the calendar function. To do this, click on the calendar icon and select the desired date in the calendar.

The date corresponds to the time of the incoming goods posting in the plant system and the interval may not exceed **7 days**.

Time to which the search should refer is entered in the form **hh:mm**.

- The **filter** is selected with radio buttons, where only 1 filter can be selected at a time. You can choose from:

- Consignment was billed and notification was sent
- Consignment was billed and notification was not sent
- Notification per VDA4921 was sent and consignment was not billed
- Carrier differs
- Unloading point differs
- Weight differs
- or No filter

- The **status** can be used to determine whether this is the first transfer or whether a change has already been made.

- Freight billing with clearing
- First transfer of T1499

- In the table header the search can also be restricted by **Plant for receipt of data** (Selection from drop-down list), **Bordero number**, **Carrier number**, **Supplier number**, **Delivery note number**, **SLB**, **WE Number** (aus NACOS) and **Transport date** (selection from calendar).

- After clicking on the **Search** button, the selected selection is displayed.

6. Search result

7. Individual rows can be selected in the **selection column**. Clicking on the checkbox in the table header selects all search results of the current search.
8. The records previously selected in the selection column can be exported with ► **Excel Export** after selecting the export type.
9. The ► **Back** function branches to the next level of navigation.

A click on the status icon or a double-click on the line branches off into the details. The **detailed view** consists of two tabs.

In the **Transport Data** tab, the data of the VDA4921 by the carrier is compared with the freight data for billing (from the plant system):

> TM > Freight clearing > Research Freight Billing (T810) > Details

Transport 12012203

Status: ✔ Transport partner number: Transport partner name:

Transport data | Consignment overview

Field	Contents	Info
Incoming goods number	2022080069611	i
Date of creation	20220830	i
Time of creation	0019	i
Status		i
Date of creation	20220829	i
Unloading point	444E	i
Weight Brutto	0000050	i !
